#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/13718

v.	Reasoned statement under Article 3 citations and explanations supporti	35(2) with regard to no ng such statement	ovelty, inventive step or industrial applica	ability;
1.	Statement			
	Novelty (N)	Claims	1-21	YES
		Claims		NO
	Inventive step (IS)	Claims	1-21	YES
		Claims		NO
	Industrial applicability (IA)	Claims	1-21	YES
		Claims		NO NO

- 2. Citations and explanations
  - This report makes reference to the following documents, which are cited in the international search report:
    - D1: DE 100 22 206 A (MIELE & CIE) 21 February 2002 (2002-02-21)
    - D2: GB-A-2 044 427 (LICENTIA GMBH) 15 October 1980 (1980-10-15)
  - The subject matter of claims 1-21 is considered to be novel, inventive and industrially applicable.
  - 2.1 D1 is considered to be the prior art closest to the subject matter of claim 1. D1 discloses (the references in parentheses are to D1):

    a built-in domestic appliance (1) having at least one optical operating status indicator (4) that can be covered by at least one cover element, wherein at least one light guide is coupled to the optical operating status indicator for transmitting at least one emitted light signal, said light guide (13) being designed in such a way that its light conduction path (12) can be adapted to the thickness of the cover element.

Similar teachings can be found in D2 (see figure 1

International application No. PCT/EP 03/13718

and corresponding passages).

Thus the subject matter of claim 1 differs from the teaching of D1 in that the light guide is composed of at least two parts in such a way that, in order to adjust the light conduction path, the second part of the light guide can be displaced relative to the first part of the light guide.

This feature has the advantage that the length of the light conduction path can be adapted especially easily to the thickness of the respective cover element (for example, a door of the domestic appliance).

None of the cited documents discloses a light guide designed in this way.

Furthermore, such a design of the light guide is not obvious from any of the cited documents.

The subject matter of the present claim 1 is therefore considered to be novel and inventive (PCT Article 33(2) and (3)).

- 2.2 Claims 2-21 are drafted as either directly or indirectly dependent on claim 1. The subject matter thereof is therefore also considered to be novel and inventive.
- 2.3 The invention is clearly industrially applicable in the field of built-in domestic appliances.
